

Punching Tools

Punching tools for high volume production of caps for vials

Among other tools GRUBER A/S supplies the pharmaceutical industry with cap punching tools.

The photo shows a triple punching tool designed for a Bruderer press performing up to 1000 strokes per minute.

Packaging Tools

GRUBER A/S has considerable expertise in producing packaging tools for thin metal. Such tools are typically constructed as draw-plate tools in round and not-round forms for ordinary packaging purposes, often for food.

As a particular speciality we also make twist-off tools for the production of screw lids for jars.

Punching tools for plastic foil etc.

GRUBER A/S is a well-known producer of punching tools of extremely high quality with die clearances down to 0.004 mm. These tools are primarily for the pharmaceutical industry using plastic foil or other thin materials with specific characteristics.

Specialist supplier to the pharmaceutical industry
