## HIGH PERFORMANCE

The market's very best and most precise tools

Do you need the market's most precise and accurate tool? Then the solution is a High Performance tool from Gruber.

A High Performance tool from Gruber ensures you high performance production. We guarantee an extremely high tool life and very high production rates.

Gruber's High Performance tools have an exceptionally long lifetime. Gruber prefers to use carbide for the most vulnerable tool elements. In addition, you get guided operation of the tool elements and a high level of precision in the frame.

The well-considered design ensures that the cost of maintaining the High Performance tools is kept to a minimum.

Get a tool with a durable surface. All the elements on Gruber High Performance tools are hardened and have milled surfaces. If you would like an even stronger surface, you can also choose to upgrade your tool with an extra strong surface coating.

All High Performance tools are cut using a coordinate grinding machine with extremely high precision. With a High Performance tool from Gruber, you can punch thin film with a compression right down to 1 - 2  $\mu\text{m}$ .

Please call Poul Bek at Gruber on +45 2687 2200, if you want the market's best and most precise tools in your production.
