

CONVENTIONAL TOOLS

Get a milled tool at a competitive price

Would you like a quality tool without blowing a hole in your budget? Gruber offers conventional tools at just as conventional prices.

→ Gruber is known for manufacturing tools of high quality for the medical industry. New investments in our machine park means that we can expand our product range to include conventional tools.

→ Gruber's conventional tools range covers guidance tools and cutting and punching tools at material thicknesses of 0.3 - 3 mm.

→ Get the right quality for your needs. Gruber can adapt your tools to the quality you need.

→ With Gruber, you can benefit from the best grinder on the market. We grind your tool with Northern Europe's most advanced co-ordinate grinding machine.

→ Take advantage of Gruber's great expertise and sense of quality. We have 15 skilled and committed employees who have 40 years' experience in manufacturing tools of high quality.

Please call Poul Bek at Gruber on +45 2687 2200, if you need grinded tools at competitive prices.
