

GRUBER

SPECIALIZED MACHINERY

Have a machine built that fulfils your needs

Rubber assembly machine, punch-thread machine or something else entirely: Gruber develops advanced machine solutions that fulfil your precise need.

Do you have a production task that requires specialized machinery? Gruber develops machine solutions based on your needs so that you are ensured an effective and usable solution that works in your production.

Choose Gruber and you are guaranteed a functioning solution. Gruber is an experienced and recognized supplier of specialized machinery for the medical industry, but we also build machinery for other sectors.

With a specialized machine you can e.g. automatically check your components, sort out defective pieces and have specific samples taken.

Specialized machinery makes your production more efficient. Gruber has developed machine solutions that can produce up to 1200 pieces a minute.

Please call Poul Bek from Gruber at +45 2687 2200, if you want a specialized machine built that fulfils your needs.
